**ENSURING THE
SUSTAINABILITY OF
AQUATIC
ECOSYSTEMS BY
ECOLOGICAL FISH
FARMING**

ECOFISHFARM

PROJECT RESULTS

- Comprehensive study of aquatic resources, water and fish product quality, and ecological status of fish ponds
- Survey on the state of aquaculture in the EcoFishFarm project area
- Laboratory modelling works
- Initiating the patenting of innovative results
- Development of the joint management framework plan regarding the development of ecological fish farming
- 2 focus groups and 4 workshops organized in both countries
- 2 round tables in the communities from the Moldovan-Romanian cross-border area
- Purchase of 1 set of laboratory equipment for molecular studies

TOTAL BUDGET: 264.878,50 EUR

EU FUNDING: 238.390,65 EUR

PROJECT START: 24.06.2025

PROJECT END: 23.12.2026
